REV008 17-Apr-2022

SP221[1]): System Progamming 2022 - 1

Week	Topic
Week 00	Overview
Week 01	Linux Kernel and Programming Interface
Week 02	Revisit Linux From Scratch
Week 03	FUSE: Filesystem in Userspace
Week 04	Project FUSE 1
Week 05	Project FUSE 2
Week 06	Project FUSE 3
Week 07	Project FUSE 4
Week 08	Project FUSE 5
Week 09	Project FUSE 6
Week 10	Project FUSE Presentation

[1]) This information will be on **EVERY** page two (2) of this course material.

STARTING POINT — https://sp.vlsm.org/

- **Text Book** — The Linux Programming Interface, 2010, No Starch Press, ISBN 978-1-59327-220-3 — https://man7.org/tlpi/.
- **Resources**
  - **SCELE SP221** — https://scele.cs.ui.ac.id/course/view.php?id=3356. The enrollment key is **XXX**.
  - **Download Slides and Demos from GitHub.com**
    https://github.com/os2xx/sp/:

Agenda

1. Start
2. Schedule
3. Agenda
4. How to contact the Lecturer
5. Assessment
6. The Three-Strikes Rule
7. Miscellaneous
8. Assignments
9. This is an elective course!

How to contact the Lecturer

- **Always introduce yourself**. State your "`GitHubAccount`", "`Name`", "`Student ID`", and "`SP class`".
- Post a question/query on **SCELE SP221** — (The enrollment key is **XXX**): https://scele.cs.ui.ac.id/course/view.php?id=3356.
- For SIAK related questions, use email: (Subject:**[SP]**) `rms46(AT)ui.ac.id`.
- **DO NOT** send an email for assignment-related questions.

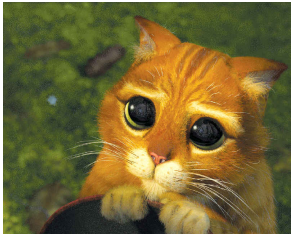

Figure: Never ever whine and pretend like this[1]!

Assessment

- **3 SKS** (Units) means 9 hours per week!
  - You need to log your weekly activities!
- **11** (weekly) assignments @ 11.11 points.
  - Assignments will vary from week to week.
  - The assignment deadline will be by the end of every week. See https://sp.vlsm.org/#idx02.
  - See the checklist at the end of this presentation.
- Final grade: the sum of the best 9 out of 11 assignments.

85 - ... = A	80 - 85 = A-	75 - 80 = B+	70 - 75 = B
65 - 70 = B-	60 - 65 = C+	55 - 60 = C	50 - 55 = D or C[1]
40 - 50 = D	30 - 40 = E	20 - 30 = E	00 - 20 = E

  - **C-2C:** up to 5 points.
    - Only if your grade is between 50.00 and 55.00, and you have a "good" track record.
  - Check your points regularly at https://academic.ui.ac.id/ and **DO NOT COMPLAIN** weeks after! See also, https://sp.vlsm.org/Log/.

[1] Terms and conditions apply — void where prohibited by law.

The Three-Strikes Rule

Source: hazzaap123/reddit

- All major academic rules violations will be handled directly by the Faculty of Computer Science, University of Indonesia.
- "Accidents" may happen. There will be warnings for the first two minor violations.
- Your final grade will be reduced for the third warning.
- Your final grade will be reduced to "D" for the fourth warning.
- Five (5) or more warnings will be considered as a significant academic-rules violation.

Out of Topic/Intermezzo/Segue

- Semiconductor Scalling.
  - 1971: $10\mu m$
  - 1984: $1\mu m$
  - 1996: $250nm$
  - 2016: $10nm$
  - 2020: $5nm$
  - 2022: $3nm$
- Fairchild Semiconductor Indonesia.
- National Semiconductor Indonesia.
- Minister of Manpower (Menteri Tenaga Kerja) 1983–1988.
- Marvell Technology, Inc (1995).
- SoC: System on a Chip.
- SiP: System in a Package.
- TSMC: Taiwan Semiconductor Manufacturing Company, Ltd.
- ASML Holding, N.V: Advanced Semiconductor Materials Lithography.
- Carl Zeiss SMT GmbH (This is NOT Optik Seis, Duh :).

The Computing Diciplines

Computing Curricula 2005 Page 12

Assignments

- There will be no mid-term (UTS) nor final-term (UAS). Instead, there will be 11 weekly assignments. Your grade will be taken from the best 9 out of 11 assignments.
- You need to run "VirtualBox" on a computer with more than 4GB RAM and up to 64 GB disk space.
- Each assignment deadline will be by the end of that "week". The weekly schedule will be at https://sp.vlsm.org/#idx02.
- Submit (push) the assignments to https://github.com/. If you still don't have one, you need to sign up for a https://github.com/ account. More information will follow.
- See the assignment list at https://osp4diss.vlsm.org/ASP.html.

This is an elective course!

- You are not required to take this course!
- This course is not for you if you:
  - do not like the Operating Systems course.
  - do not like to get your hands dirty.
  - do not have enthusiasm nor initiative at all.
  - do not like to "hack".
- Cold Feet? Second Guess? You might want to drop this course now (this week)!
- This is the way!
